SAFETY ENHANCEMENT

SAFETY RESOLUTION CONFERENCE

HSG SUNGDONG held a Safety Resolution Conference on the 14th to further emphasize their commitment to safety. Approximately 1,600 participants, including all employees, subcontractors, and supervisory staff, attended the conference. The purpose of this resolution conference was to strengthen internal safety and establish a more effective safety cooperation system.

In addition, various safety measures were implemented, such as special safety inspections and signal safety training to prevent any possible safety accidents. The focus was on addressing potential risk factors and issues discovered on site.

SAFETY ENHANCEMENT

SAFETY RESOLUTION CONFERENCE

In order to disposing of faulty and old equipment, the entire yard implemented a short work stoppage to conduct inspections of hanging equipment on-site and addressed issues. This solidified HSG SUNGDONG's commitment to its safety-first management policy, emphasizing the importance of ongoing on-site equipment inspections.

Through these efforts, HSG SUNGDONG demonstrated their determination to ensure a safe working environment, contributing to the satisfaction of clients and employees. It has been emphasized that on-site employees' opinions regarding improvements in the working environment and safety-related matters will be reflected.

They expressed the intention to address even minor safety-related issues and urged all employees to show interest and cooperation in creating a safe environment through special education and measures.

HSG SUNGDONG is also committed to strengthening the overall level of safety management with the belief that there are no blind spots when it comes to safety.

YARD PROMOTION VIDEO

PPI COLLABORATED PROMOTION VIDEO

HSG SUNGDONG's yard promotional video production is progressing smoothly. Currently, HSG SUNGDONG communicated to PPI (Principle Power Incorporation) to strive for better results through the exchange of information and images in relation to future projects.

According to PPI news on February 15, PPI Aker Solution has been appointed as contractor of FEED design company of Haewoori project and will closely cooperate with HSG SUNGDONG continuously.

This production aims to bring customers' satisfaction and promotional effectiveness by providing visual understanding throughout the video and storytelling.

HSG SUNGDONG is confident that the promotion video, utilizing sophisticated photos and videos with the latest technology will convey more detailed information about the yard layout, figures, and other aspects than the documented materials.

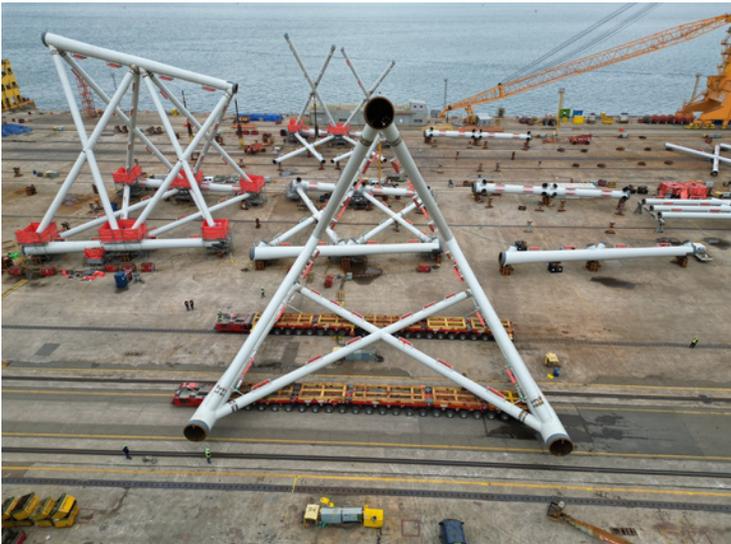

OFFSHORE WIND PROJECT

GREATER CHANGHUA 2B & 4 PROJECT

HSG SUNGDONG's Ørsted's Greater Changhua 2b & 4 project is progressing smoothly.

Currently, the final painting for the several Transition Pieces (T.P) out of the 33 T.Ps of the project has been completed. The painting process for the third T.P is also underway in the paint shop.

Jacket Leg Fabrication is also proceeding, and HSG SUNGDONG is expected to complete the fabrication of all 33 jackets within the scheduled timeline without major issues.

HSG SUNGDONG's goal is to become a company that contributes to a sustainable future, harnessing the potential of offshore wind energy and playing a crucial role in offshore wind power field.

With this continuous fabrication ability, HSG SUNGDONG will accelerate efforts to capture a larger share of the global offshore wind power market.
